## Press Release:

### Crawford Technologies Introduces **Universal Print Stream Processor**

**Toronto, Ontario, October 20, 2004** - Crawford Technologies Inc. today introduced the newest member of the Enhancement Series, the **PRO Document Enhancer** software product, with superior print stream post-processing capabilities. **PRO Document Enhancer** operates on virtually any print stream including AFP, PostScript, PDF, PCL, Xerox LCDS and Metacode and it runs on all main computing platforms including Windows, Linux, AIX, Solaris, HP-UX, OS/390 and z/OS. **PRO Document Enhancer** can also operate on a print stream while it is being converted from one format to another using any of the **PRO Suite** of print transform products.

**PRO Document Enhancer** is a very powerful post-processor, offering the ability to add, delete, move, colorize and modify elements in documents including text, barcodes, OMR, form fields and index information. It can also merge information from external files and interface with Postal Optimization software such as the Automail product from Syntel LLC.

“**PRO Document Enhancer** can be used for a myriad of tasks. Some of the uses our customers have already used it for include adding OMR marks with integrity counts and selective inserts, adding Postal bar codes, moving sections of pages around, inserting cover sheets for envelope optimization, adding indexing information for archival systems, doing address verification and suppressing portions of pages” exclaimed Ernie Crawford, President of Crawford Technologies Inc., adding “This marks the beginning of an era when users can

take control of print files and implement the changes they need without having to make expensive application program changes".

**About Crawford Technologies Inc.**

Crawford Technologies, Inc. provides print stream transform, extraction and manipulation solutions that are unsurpassed in the industry. With its committed and knowledgeable product teams, Crawford provides unparalleled development, design and customer support. Crawford is a global leader in providing advanced print production transformation products for the financial, insurance, medical, government and telecommunications industries. Crawford's powerful suite of conversion and enhancement products automates the transformation of print-stream, data manipulation and document output. Crawford Technologies, Inc. is based in Canada. Its Toronto and Vancouver development centers produce high-quality, cross-platform products using advanced development and testing techniques.
