Press Release:

Crawford Technologies Introduces
PRO Transform Manager Version 2

<u>**Toronto, Ontario, March 21, 2003**</u> **-** Crawford Technologies Inc. today introduced their newest transformation management solution, ***PRO*** Transform Manager Version 2.   This latest version adds significant functionality to permit clients to even more dynamically control their printing process.   These organizations need to route documents such as statements, invoices or reports to multiple and different printers or distribution systems.   By utilizing the ***PRO*** Transform Manager, clients can further automate their print production process without having to change existing workflow and operating environments.

One of the key features of this version of ***PRO*** Transform Manager Version 2 allows clients to specify an unlimited number of asynchronous transformation processes letting any number of transforms process simultaneously.   Coupled with a new and user-friendly graphical interface, clients will find it very easy to manage and control their entire transformation process including: file splitting, index extractions, document enhancement and output management.   The multi-threading GUI-based ***PRO*** Transform Manager is available on Solaris, Linux and Windows.   Like all other Crawford modules, this software is compatible with the entire suite of ***PRO*** transform products.

PRO Transform Manager is another product from Crawford that allows more functionality without changing the way companies are doing business. This management module provides integration flexibility.   Like the previous version, ***PRO*** Transform Manager Version 2 facilitates web loading.   For example, a

Xerox Metacode mainframe file can be split into sub-documents, transformed to PDF and routed to a website for immediate access worldwide, all fully automated.

"Combined with any of our print-stream transforms, this tool gives users a very powerful, yet simple operational tool. We have designed this product to allow operators with very little training to be able to monitor and manage a production environment with a continuous flow of print files being converted, printed and distributed", exclaimed Ernie Crawford, President of Crawford Technologies Inc.

Jay Pollitt, VP of Sales and Marketing states, *"This version of our **PRO Transform Manager** provides our clients with one of the most user-friendly interfaces in the industry. The end user can literally watch a job process while concurrently monitoring any file conversion output problems".*

About Crawford Technologies Inc.

Crawford Technologies Inc. provides print stream transform, extraction and manipulation solutions that are unsurpassed in the industry. With our committed and knowledgeable product teams, Crawford provides unparalleled development, design and support. Crawford is a global leader in providing advanced print production transformation products for the financial, insurance, medical, government, and telecommunications industry.
